

SESSION 5b: COMPOUND SEMICONDUCTORS IN CHINA

Chair: Mariam Sadaka, *Soitec USA*

This session includes one talk by Dr. Morris Young, CEO of AXT, Inc. Dr. Young will talk about China's fast growing role in the future of compound semiconductor technology and manufacturing. The presentation will focus on the key activities supporting the growth, such as contributions of the private and public sectors and the role played by technical institutions and universities. Furthermore, different segments and geographic distribution of the compound semiconductor industry in China will be reviewed along with some details of the growth projections for the coming 5 years.
