

## **Missy Stigall**

SVP, Global Fab Operations – Wolfspeed

Missy is Wolfspeed's Senior Vice President of Global Fab Operations and is responsible for the strategy and direction of Wolfspeed's Mohawk Valley Fab, RTP Fab, and Durham Fab, developing innovative production solutions, building dynamic manufacturing and engineering teams, and delivering on-time quality execution that meets customer needs. In addition, she sponsors Wolfspeed's Management of Change initiative, is responsible for several initiatives in the Global Operations organization, and has a passion for driving critical conversations that result in solutions that evolve inclusion and diversity.

Missy has 23 years of experience in the semiconductor industry, encompassing a wide range of roles. She graduated from Southern Methodist University with a B.S. in electrical engineering and from Kettering University with a M.S. in engineering management.
